All renderings and plans are artist's conceptions and subject to change without notice. All measurements, locations and features shown are approximate and may vary. All prices, features and materials are subject to change and availability. Equal housing opportunity. Each site is subject to specific site conditions. If applicable, foundation design, exterior finishing and materials, grading/draining and commensurate retaining walls, decks/patios and supporting columns, and other items – may all vary from site to site. Consult your sales team for the specific conditions for your site. 4.4.2024

Nutcracker

This relative of jays and crows is pale gray with a whitish face and black wings. Sexes are similar; juveniles are browner than adults. Found almost exclusively in coniferous forests at high elevations; feeds on pine cone seeds and stashes thousands of them in various places to eat later in the winter. Often found in flocks. Sometimes visits feeders. Similar in color to Canada Jay, but especially note bill shape: long, slender, and sharply pointed.
