

Paired Homes

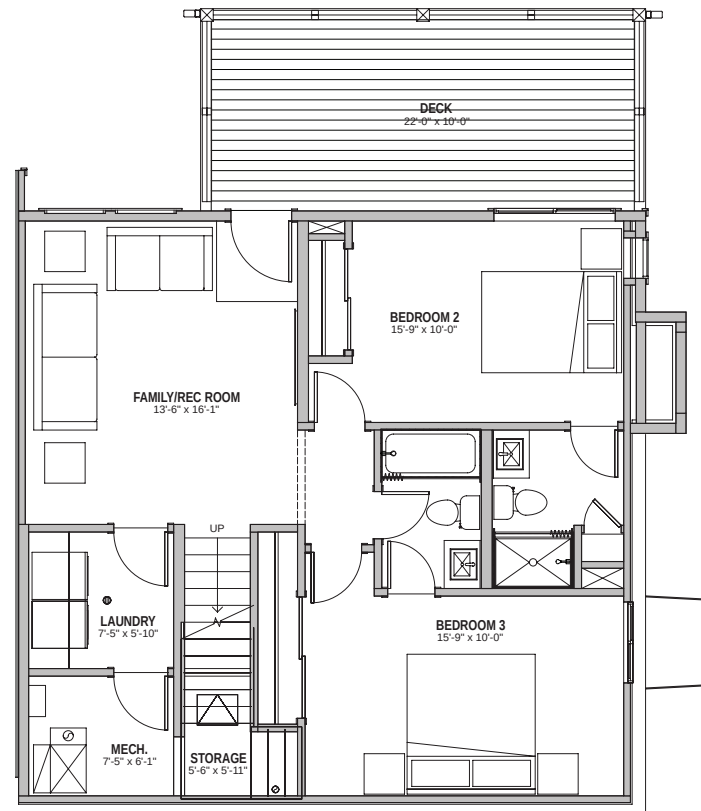

- 1,761 Finished Square Feet
- 3 Bedrooms, 3.5 Baths
- Main Level Primary Suite
- Both secondary bedrooms are ensuites
- Two large decks; one at Main Level, one at lower level
- Second gathering space at Lower Level

Main Level
942 Square Feet

Lower Level
819 Square Feet

Nutcracker

This relative of jays and crows is pale gray with a whitish face and black wings. Sexes are similar; juveniles are browner than adults. Found almost exclusively in coniferous forests at high elevations; feeds on pine cone seeds and stashes thousands of them in various places to eat later in the winter. Often found in flocks. Sometimes visits feeders. Similar in color to Canada Jay, but especially note bill shape: long, slender, and sharply pointed.
